The iMathTutor® Featured Problem Series

iMathTutor® • 13 Oct 2025

The Summer 2025 Featured Problem Series ran on my website from June 2 through August 4. A new series begins today, October 13, and runs through December 15.

Each Monday during the run a new problem will be posted along with the solution to the previous week's problem. These will be posted at

The Fall 2025 Featured Problem Series

The problems come from the courses I tutor, and include problems from combinatorics, probability, abstract algebra, real analysis and more.

There is also an archive of the Summer Series problems and solutions at the above link. Today I am posting the archive content here too.
